

Arafat Hossain Shifat

CYBER SECURITY SPECIALIST

PROFILE

Cyber Security Specialist with 8+ years of experience in online platform support, social media account protection, account recovery guidance, and website security checkup. Skilled in helping individuals, creators, and businesses secure Facebook, YouTube, TikTok, Instagram, LinkedIn, and websites through safe, ethical, and professional methods.

PROFESSIONAL EXPERIENCE

Cyber Security Specialist, Independent Online Platform Support

2016 - Present

- Provide professional support for Facebook pages, profiles, Business Manager, admin access, account restrictions, and security issues.
- Guide users through safe recovery steps for hacked, disabled, restricted, locked, or lost access accounts.
- Improve social media account safety by setting up two-factor authentication, login alerts, privacy settings, and device review.
- Support YouTube creators with channel security, Google account protection, permission review, and recovery guidance.
- Help website owners identify basic security risks, malware symptoms, weak login protection, backup issues, and improvement plans.

Online Security Consultant, Social Media & Website Protection

Project-based Support

- Worked with creators, business owners, page admins, freelancers, and professionals to secure digital platforms and prevent future risks.
- Explain complex security problems in simple language and provide step-by-step guidance for safer online platform management.
- Assist users in understanding phishing links, fake login pages, suspicious activities, and common cyber threats.

SELECTED PROJECT EXPERIENCE

Facebook Page Recovery & Protection

- Supported page owners with admin access issues, Business Manager problems, page restrictions, and security improvements.

YouTube Channel Security Setup

- Guided creators in securing their connected Google account, reviewing permissions, and protecting channel ownership.

Website Security Checkup

- Reviewed basic website risks and provided guidance for malware awareness, login protection, backups, and safer maintenance.

EDUCATION

Cyber Security & Online Platform Protection
